Ultrasonic Scaling Inserts

Popular Styles For Your Power Scaling Needs

Power Equipment

	#10 Universal	#100 Thin	#1000 Triple Bend
Tip	Medium length straight shank extending to a tapered tip. **Tip Cross Section:** Round	Long thin straight shank extending to a thin tapered tip. **Tip Cross Section:** Round	Unique triple bend shank design allows increased access around line angles and interproximally. Beveled edges on the tip enhance removal of heavy stain and calculus. **Tip Cross Section:** Diamond Shape
Area of Use	Supragingival; Subgingival only if tissue allows	Subgingival—designed specifically to reach into periodontal pockets; Also can be used supragingivally	Supragingival; subgingival only if tissue allows
Deposits	Light to heavy, tenacious calculus, orthodontic cement	Light to Moderate	Moderate to heavy, tenacious calculus, orthodontic cement
Power Setting	Low to High	Low to Medium	Low to High

	XT	XT Triple Bend	#3 Beavertail
Tip	Long, ultra thin curved shank tapers to a thin tip. **Tip Cross Section:** Round	24% thinner than the #1000 Triple Bend, allowing increased access around line angles and interproximally. Beveled tip allows enhanced calculus and stain removal. **Tip Cross Section:** Diamond Shape	Thick, broad, flat tip **Tip Cross Section:** Trapezoidal
Area of Use	Subgingival; ideal for narrow, deep pockets, furcations, developmental concavities and tight areas between misaligned teeth	Supra- and subgingival	Supragingival
Deposits	Light to Moderate	Light to Moderate	Heavy deposits, tenacious stain and orthodontic cement
Power Setting	Low to Medium	Low to Medium	Medium to High

	After Five™ Left, Straight & Right	Power Plus Beveled & Conical
Tip	Probe sized insert tip; Long curved shank narrows to a tapered tip. **Tip Cross Section:** Round	25% longer tip design to reach deep into periodontal pockets. 2mm longer than #10 Insert. **Tip Cross Section:** Round (Conical) Diamond Shape (Beveled)
Area of Use	Used to remove calculus from periodontal pockets with improved adaptation in interproximal areas, furcations and developmental concavities	Supragingival and subgingival; wide, deep pockets (standard), narrow, deep vertical pockets and crowded areas (thin)
Deposits	Light to Moderate	Moderate to Heavy (standard), Light to moderate (thin)
Power Setting	Low to Medium	Low to High (standard), Low to Medium (thin)

HuFriedyGroup Inserts are compatible with the SWERV™ 3 Scaler as well as all Cavitron® and Cavitron-compatible generators.*

SELECT YOUR HANDLE & WATER DELIVERY STYLE

		Swivel Direct Flow™ Handle	Swivel Handle	Streamline™ Plus Handle	Streamline™ Direct Flow Handle	Streamline™ Handle
		With a slight rolling motion of the fingertips, the handle and tip of a Swivel Insert rotates 360°, allowing for smooth and efficient power scaling. **Water:** Direct flow near the insert tip for enhanced visibility.	The same features as Swivel Direct Flow™ Handles **Water:** Deliver from the base of the tip.	The ergonomic, wide grip results in less hand fatigue and enhanced tacticle sensitivity. The tapered cone provides a better view of the treatment area for the clinician. **Water:** Direct flow near the insert tip for enhanced visibility	A lightly textured, wide diameter resin handle designed to reduce finger pinching and enhance clinician comfort. **Water:** Direct flow near the insert tip for enhanced visibility.	The original lightly textured Streamline handle. For those who prefer a slightly smaller diameter handle the Streamline handle is an ideal choice. **Water:** Delivery from the base of the tip.
