

HD Mirrors

FACT

According to experts, 99% of diagnostics in dental is visual.¹ In order for clinicians to deliver accurate diagnoses, their mouth mirror needs to provide the highest degree of clarity and visibility in every procedure.

CHALLENGE

Standard rhodium-coated mirrors offer average clarity and visibility, keeping the clinician from reaching the highest level of performance.

SOLUTION

Our new High Definition Mirrors feature a proprietary coating that provides superior brilliance and color for increased visibility in all dental procedures. Also scratch-resistant, our HD mirrors are the clear choice for optimal patient treatment.

HD Coating vs Rhodium Coating

Why Our HD Mirrors Are Superior

- **113%** reflection factor for exceptional image clarity²
- **38.5% brighter** than rhodium coated mirrors²
- **50% brighter** than other front surface mirrors²
- **Scratch-resistant** for product longevity
- **Large ergonomic handle** options

HD Mirror Cone Socket Options
