

HU-FRIEDY BAGETTE®

Self-Sealing Sterilization Pouches

Hu-Friedy's Bagette® self-sealing sterilization pouch line includes a variety of sizes created to fit all sterilization needs:

- Four pouch sizes specifically designed to fit all of Hu-Friedy's IMS Signature Series cassettes.
- Additional sizes are available for the sterilization of other items including rubber dam clamps, burs, handpieces and loose instruments.

POINTS OF PERFORMANCE

Internal and external indicators for both Steam and EO Sterilization. Responds to all variables of sterilization: time, temperature & presence of steam

Thumb notch for ease of opening

High quality medical grade paper and multi-layer blue tinted film provide strength and durability

Thick, strong thermal seal to protect against cassette and instrument breaches

Wide self-seal adhesive strip to provide reliable seal

Pouches are lead free and are not made with natural rubber latex

How the best perform

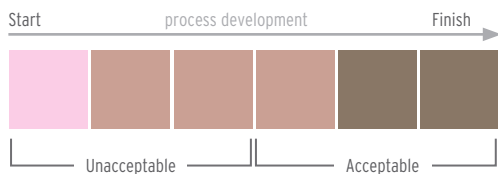

COLOR CHANGE GUIDE

Below is a color change guide to aid in the interpretation of the color change that occurs when the pouches are processed in an autoclave, or ethylene oxide sterilization chamber.

Ideally, the indicator should change color from the first box to the last box, but due to the large variation in sterilization chambers, this is not always the case. Therefore, there is a suggested acceptable range of color change. See diagrams below for details.

STEAM STERILIZATION

EO STERILIZATION

Caution: the chemical indicators are to be used as a sterilization process indicator only. The indicators should be used in conjunction with biological indicators (spore strips) to ensure the devices within the pouches are sterile.
