# Ergo Dynamic™ Elevators

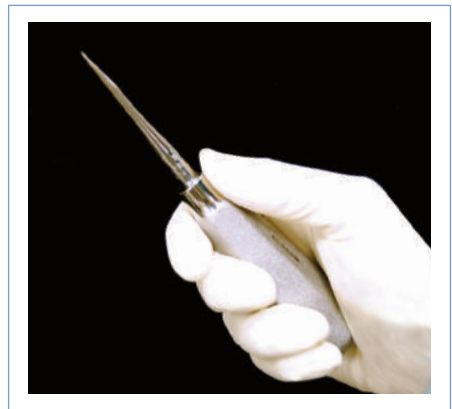

Ergo Dynamic Elevators offer an alternative to standard size elevator handles. One size does not fit all... you can now choose between a standard size elevator handle or a small handle design to fit your needs.

## Actual Size Comparison

Ergo Dynamic Small Elevator vs. Standard Elevator

- Ergo Dynamic elevators allow for increased comfort and ease of use for clinicians that prefer small handled elevators.
- Allows for better fit in your hand. Choose from standard size elevators or ErgoDynamic, small handled elevators to best fit your needs.
- Provides better leverage for increased performance during procedures.
- Available in most popular Hu-Friedy elevator patterns.
- Hand crafted from Immunity Steel® and heat treated to provide optimal sharpness and durability.

Correct Fit for Smaller Hand
