

LUXATING HYBRIDS

PRECISION AND DURABILITY COMBINED

FACT

The use of unsuitable surgical instruments for tooth extractions can lead to undesirable results and patient dissatisfaction.

CHALLENGE

Extracting teeth or broken root tips without causing trauma to the buccal plate can become difficult without the correct instruments.

SOLUTION

Luxating Hybrids were designed with thin, precisely angled tips to aid clinicians in preserving the buccal plate during atraumatic extractions.

INCREASED INSTRUMENT CONTROL WITH ERGONOMIC, SATIN STEEL® HANDLE

POINTS OF PERFORMANCE

- **Improved apical and interproximal access** with thin working tips
- **Enhanced oral adaptation** with 7 precisely manufactured tip options
- **Easily severs the periodontal ligament** with finely honed, sharp cutting edges
- **Longevity and corrosion resistance** afforded by hand-crafting from the finest grade surgical stainless steel

How the best perform

Hu-Friedy®

LUXATING HYBRIDS

STRAIGHT SPADE (EPTSSP)

SMALL STRAIGHT (EPTSMS)

SMALL CURVED (EPTSMC)

SMALL DISTAL (EPTSMD)

SMALL MESIAL (EPTSMM)

LARGE DISTAL (EPTLGD)

LARGE MESIAL (EPTLGM)

For clinicians who are interested in the entire Luxating Hybrid line, Hu-Friedy has created a kit with all seven instruments for atraumatic extractions.

It also includes a sharpening stone to keep these instruments performing like new.

LUXATING HYBRID KIT

EPTKIT

Small Signature Series® 8 Instrument Cassette, Red	IM5080
