

TECHNICAL DATA SHEET

PRODUCT NAME Sani ProZyme™ Enzymatic Detergent

PRODUCT OVERVIEW

Sani ProZyme Enzymatic Detergent is a cleaner designed to remove blood, tissue and other proteins from delicate instruments. It contains a proteolytic enzyme for effective cleaning of protein-rich soils, is not corrosive to instruments and is low foaming. Can be used for both manual and automatic cleaning.

COMPOSITION

- Glycerin (CAS#: 56-81-5), 7% to 13% by weight
- Subtilisins, proteolytic enzymes (CAS#: 9014-01-1), 0.1% to 1% by weight

DETAILS

- Light green liquid concentrate
- Neutral pH: safe and compatible for use on delicate instruments
- Rust inhibitors: reduces likelihood of rust, tarnish or corrosion
- Rinsing agents: leaves instruments spot and residue-free
- Low-foaming: compatible with all equipment and pump systems
- Environmentally-friendly: biodegradable and phosphate-free

PACKAGING

Product is available in the following configuration:

Product Code	Description
JED	Sani ProZyme™ Enzymatic Detergent, 1-gallon (3.8 L) bottle (4 bottles/case)

STORAGE REQUIREMENTS

Store in a dry place at room temperature (15 °C to 30 °C / 59 °F to 86 °F)

SHELF LIFE

- 2 years (unopened) from date of manufacture
- 6 months (after opening) to yield superior results

DISPOSAL

Dispose of the product and container in accordance with all applicable local, state, and federal regulations.

REGULATORY INFORMATION

US FDA 510(k) #: Exempt
 Regulation: 880.6150
 Regulation Name: Ultrasonic cleaner for medical instruments
 Regulatory Class: Class I
 Product Code: FLG
 Medical Device Listing: D143248
