GENERAL SURGERY KIT

Instruments are placed in a surgical cassette according to the order in which they will be used during the surgery. These instruments are sterilized in the surgical cassette before the surgery. The instruments are used out of the cassette and are kept in order during the entire surgical procedure.

GENERAL SURGERY KIT

Instruments Designed by Istvan Urban

The Urban Mini Me

is designed with angled, sharp working ends for minimal invasive flap elevation in the esthetic zone and for papilla elevation and tunneling.

The Mini Me can be used for much more—for lingual flap elevation, used during mandibular ridge augmentation surgery and for blunt flap advancement.

PT1X
1 Periotome, Posterior, **Black Line**

10

PPR3X
PR-3 Prichard Periosteal, Short, **Black Line**

Black Line
is designed to optimize clinical outcomes by delivering efficiency throughout perio and surgical procedures. Black Line instruments feature a dark performance engineered coating which reduces light reflection. The dark coating provides enhanced contrast, improving visual acuity at the surgical site, supra- and sub- gingivally. The coating also assists with edge retention.

DeBakey **Perma Sharp™** Tissue Pliers,
Straight, 15 cm

Perma Sharp™ Instruments

Featuring tungsten carbide inserts bonded to surgical-grade stainless steel on both cutting edges for smooth, controlled cutting and maximum durability.

Did you know?

All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like Instrument Lubricant Spray (**ILS**), will prevent rust, corrosion and stiff joints to ensure smooth operation. **All hinged instruments should be sterilized in the open position.**

2 Molt Surgical Curette, #502 Handle

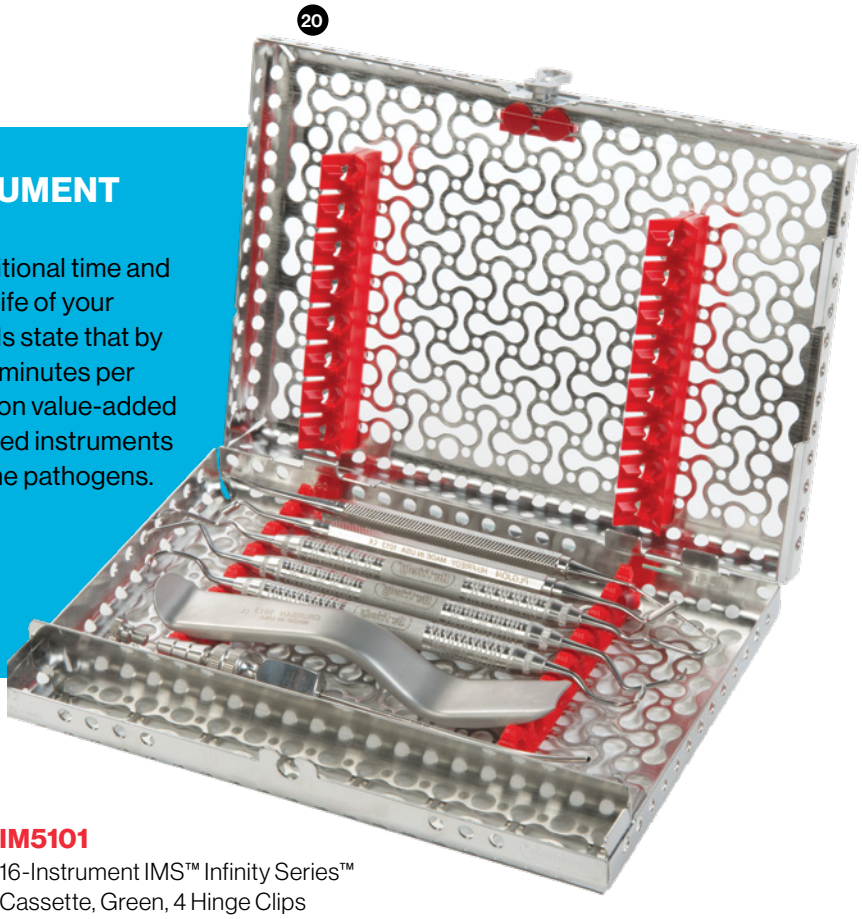

WHY YOU SHOULD USE AN INSTRUMENT MANAGEMENT SYSTEM:

By standardizing your instruments with IMS, additional time and revenue is generated while extending the useful life of your HuFriedyGroup instruments. Dental professionals state that by implementing IMS™ Cassettes, they save 5 to 10 minutes per procedure allowing the staff to spend more time on value-added activities*. In addition, safer transportation of soiled instruments reduces risk of injury and exposure to blood borne pathogens.

* When compared to single instrument decontamination. Based on market survey results.

PROF. ISTVAN URBAN DMD, MD, PHD

URBAN REGENERATION INSTITUTE

COURSES:

- 9-Day Regenerator Program
- 3-Day Advanced Bone and Soft Tissue Course
- 2-Day Soft Tissue Course
- 2-Day Sinus Course
- 4-Day IDR Course
- Endo Course

Developing minimally invasive regenerative techniques led to favorable long-term clinical outcomes. I have a passion for sharing those important surgical details, the science behind all the innovation and the long term follow up of the cases that puts all details to a credible prospective.

I would like to invite you to join our courses where we honestly discuss the realities of hard and soft tissue regeneration.

Prof. Istvan Urban
