

HU-FRIEDY SIGNATURE SERIES™ PROCEDURE TUBS

GET ORGANIZED
& BE EFFICIENT

How the best perform

IMS CASSETTE AND TUB SYSTEM

HOW CASSETTES AND TUBS WORK TOGETHER:

- Together, procedure tubs and cassettes create the most efficient and organized system for managing instruments and consumable products.
- Time savings achieved by using IMS (Instrument Management System) cassettes and procedure tubs will allow the staff to spend time on more value added activities in the dental office.
- Procedure tubs can be used as portable operator drawers to store, organize and transport consumable materials to and from the storage/sterilization area and the operator.
- All of the materials needed for a specific procedure can be stored in the tub. A different tub and color can be used for each different procedure type (crown & bridge, composite, etc.).
- The Signature Series procedure tubs are available in colors that match IMS cassette rails, which allow the staff to match the tubs and cassettes by procedure.

AN EXAMPLE OF HOW IT WORKS:

- Blue cassette rails and a blue tub may represent a composite procedure. All of the consumable materials for composite procedures can be stored and organized in the blue tub and instrumentation stored in the cassette with blue rails, allowing for quick identification.

SIGNATURE SERIES PROCEDURE TUB BENEFITS:

STANDARDIZES MATERIAL SET-UP FOR EVERY TYPE OF PROCEDURE

- Increases efficiency of materials management
- Eliminates time-consuming tray preparation for every procedure
- Tubs may be configured to meet your office needs or are available as a complete tub

PROCEDURE TUB COLORS MATCH HU-FRIEDY IMS CASSETTE RAIL COLORS

- Increases office organization and workflow efficiency
- Allows for quick identification of consumable products
- Provides esthetic integration with IMS cassettes

LOCKING COVERS

- Protects items from airborne materials during transportation and storage
- Adheres to infection control standards

MICROBAN® ANTIMICROBIAL PRODUCT PROTECTION

- Microban inhibits the growth of microorganisms that can cause stains, odors and product degradation
- Microban is registered with the EPA for these applications

ALLOWS FOR STORAGE IN CENTRAL STERILIZATION OR EACH OPERATORY

- Tubs can be transported to the operatory prior to each procedure, eliminating inventory management of materials in each operatory

SIGNATURE SERIES™ TUBS

MICROBAN® ANTIMICROBIAL PRODUCT PROTECTION

Microban protection is integrated into the tub and tub components during the manufacturing process. Microban technology works by interrupting key cell functions that allow the microorganisms to function, grow and reproduce. Microban protection begins to work as soon as the microorganism comes into contact with the product surface and works continuously to inhibit the growth of microbes that can cause stain, odors and product degradation - for the lifetime of the product.
