THE IMPLANT SURGERY & TISSUE REGENERATION KIT

The Jovanovic Implant & Regeneration Surgical Kit includes exceptionally crafted instruments specifically designed for advanced & minimal invasive periodontal and implant surgery. This sophisticated kit includes precision-engineered instruments fashioned from premium materials. Ergonomics plays a critical role in a clinician's long-term success which led to the incorporation of Black Line instruments. The dark coating minimizes glare, is visible when used subgingivally, and adheres less to surgical materials.
The use of IMS™ Cassettes ensures easy access to instruments, keeping everything needed for procedures within reach.

University of Minnesota
Retractor, **Black Line**

BLACK LINE
Black Line is designed to optimize clinical outcomes by delivering efficiency throughout the entire perio and surgical procedure. Black Line features a performance engineered coating for optimal edge retention, reduced light reflection afforded by the black matte finish and enhanced contrast and visual acuity at the surgical site and underlying tissue.

Ocean Blue	11

WHY YOU SHOULD USE AN INSTRUMENT MANAGEMENT SYSTEM (IMS):
By standardising your instruments with IMS System, additional time and revenue is generated while extending the useful life of your HuFriedyGroup instruments. Dental professionals state that by implementing IMS™ Cassettes, they save 5 to 10 minutes per procedure allowing the staff to spend more time on value-added activities*. In addition, safer transportation of soiled instruments reduces risk of injury and exposure to blood borne pathogens.

*When compared to single instrument decontamination. Based on market survey results.

SUGGESTED INSTRUMENTS (not included in the kit)

RBOE
Boehler Rongeurs
double hinged, 16 cm

H4
#4 Mosquito Hemostat,
Straight 12 cm

DID YOU KNOW?
All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like Instrument Lubricant Spray (**ILS**), will prevent rust, corrosion and stiff joints to ensure smooth operation. **All hinged instruments should be sterilized in the open position.**

SUGGESTED BLADES AND SUTURES (not included in the Kit)

PSNPTFE1
3-0 PTFE, Undyed Reverse Cutting 19 mm
3/8 circle Reverse Cutting 45 cm
