

RESIN 8 COLORS

The Colors You Want, the Quality You Deserve

FACT

Many clinicians want lightweight resin handles that provide easy identification of instruments in the operatory.

CHALLENGE

Current lightweight resin handles offer color options but do not feature high quality working ends that stay sharper longer.

SOLUTION

Hu-Friedy's Resin 8 Colors feature lightweight color handles for easy identification combined with our exclusive **EverEdge® Technology** for the quality and performance you know and trust from Hu-Friedy.

POINTS OF PERFORMANCE

- **EverEdge Technology** provides consistently sharp, long-lasting cutting edges for efficient scaling
- **Easy Instrument Identification:** Eight distinct colors allow clinicians to quickly and easily select instrument types that follow a color-coding system based on the specific area of the mouth where it is used
- **Reduced Pinch Force:** Hu-Friedy's largest diameter handle has the optimum weight for a more comfortable grip
- **Increased Rotational Control:** The unique textured handle design has wave grooves and a special knurling texture that increases rotational control, providing a light secure grasp

How the best perform
